### The role of ultrasound in the study of Implantation Failure

Renato Fanchin. Hôpital A. Bécclère. University of Paris. Clamart. France

13:00

### Evaluation of human embryo competence for implantation using CGH-microarray

Belén Lledó. Instituto Bernabeu. Alicante. Spain

13:30

### RIF as an expression of coagulation disorders and suggested treatments

Pascual Marco. Professor of Haematology at Miguel Hernández University. Elche. Spain

14:30

### CLOSING REMARKS

Rafael Bernabeu. General Director of Instituto Bernabeu. Alicante. Spain

Dear friends and colleagues,

We are proud to present the 1st Edition of "Meeting the Experts",

- I. B.'s Meeting the Experts was born as an attempt to clarify relevant and controversial topics in the field of Reproductive Medicine, by sharing the latest knowledge from different standpoints brought to us from the most authorized experts.
- Thus we have been committed to creating a friendly and scientific environment for discussing topics of great clinical interest that we face every day making their therapeutic management difficult.

Therefore we have dedicated this first Meeting to two complex questions.

When we welcome you on Friday the 31st of May, we will be discussing low ovarian response and Saturday the 1st of June will be dedicated to repeat implantation failure.

We have chosen very well-known specialists and experts in the field who will develop and present their work to all of us in a conversational and interactive way.

For them, our warm thanks for accepting our invitation to come from the US and different European countries, making this top level reproductive medicine congress become true.

We are sure that the importance of the selected subjects and the quality of the speakers will make this a unique session to update our knowledge and improve our patients' prognosis.

On behalf of the Scientific Committee, our warmest welcome.

Dr. Rafael Bernabeu  
Dr. Joaquín Llácer  
Presidents of Meeting the Experts
